
Size mapped to word length

Distribute the software not as a clean code base to be used but rather as a tutorial to make it yourself. So the person whoever uses this tool can fix it, edit it and change it rather than relying on updates from a developer. Think of making a repl/code editor on a webpage and have interactive tutorial for it.

Weight inversely mapped to word length

FoldFace is a an obtusely simple file format for defining typefaces. Typefaces can be designed by folding thin and long strips of paper and logging the fold points into a **FoldFace Editor**. A **FoldFace** file can be run to output an .otf or .ttf file. The **FoldFace** specification outlines the structure for reading and writing a **FoldFace** file so anyone interested to can implement their own editor, or iterate on existing ones.

The **FoldFace** specification outlines the structure for reading and writing a **FoldFace** file so anyone interested to can implement their own editor, or iterate on existing ones.

Face mapped to word length

The structure enables composition, but it doesn't determine it. A page has a certain order of space but that doesn't determine the order or the composition of content. There's a particular order of a space on a page, but that will not control the way content will appear on the page. Everything is contingent on everything else, except for the composition. The composition is decided a priori. Using ~> dependencies as a way to talk about how this tool is different. In InDesign, composition is decided on top of which grep style can be applied.

Weight mapped to vowel count

The book tool **can** represent sheets (**pre** fabrication) **and** spreads (**post** fabrication) **for any** configuration (page numbers) **which can** also **be** thought **of as** locations **in** time **or** locations **in** process. **For** instance sheets have **a** linear location **of** coming before having assembled **to form** spreads. **So** these views **can be** thought **of as** keyframes. **The** sequence **of the** book itself obviously **is** also linear keyframes. **The** makes **me** also **think**, multiple layer books, book jackets **as** layers **that** come together **to form a** book? Thinking along these lines **and** write **a blurb**

Weight and size mapped to vowel count

Talks **about** music, the role of effort in **learning**, the **value** of **constraints**... **iteration**, slowly carving a **performance** or thing....
I think I need to **embrace constraints** as he points out in the talk. Having very few **options**, vector edits based on svg... so lines and curves. There's **already** good **enough interface** models for this so just stick to them. Having some **image** stuff... This shouldn't be hard. Color **adjustments**, masks, crops and **transforms**. And text **layouting**.

Rotation mapped to word length

Language^e carries rhythm even in silent reading. Each word tilts the balance of perception slightly, creating a visual cadence across the page.

Opacity mapped to vowel count

“Emergence is the way complex systems and patterns arise out of a multiplicity of relatively simple interactions”—I will repeat these words from Nick Obolensky throughout this book because they are the clearest articulation of emergence that I have come across. In the framework of emergence, the whole is a mirror of the parts. Existence is fractal—the health of the cell is the health of the species and the planet.

Letter spacing mapped to word length

It is the intention of most vegans to cause as little harm and as little suffering as possible to all sentient beings, including field mice. That some measure of harm will result from some of our choices is practically unavoidable. What the vegan concern themselves with, however, is minimizing that harm as much as they can by making choices that don't require that animals be enslaved, exploited, and slaughtered.

Size + rotation mapped to word length

Distribute the logic across perception so that reading becomes
an act of reconstruction rather than passive intake.

Inverse size + bold weight for short words

Short words punctuate **rhythm while longer**
ones stretch **time across the** surface **of**
reading.

Vowel-based rotation + weight

The kitchen **now, for me, is a** place **of** ownership **and** control **and (very very** ^{low-level} **mastery in a way** **it has** never been before. **Plop me in the middle of** **it and I am** ^{certain} **I can** make something ^{delicious} **in 20** minutes ^{given whatever} **is at hand, I** have never **felt this way** ^{before,} **and may** never have gotten to **this** place without forced ^{isolation}. I've cooked every meal here **for the last two months. It has** ^{unlocked} **a delight and** ^{culinary eroticism} **that was** hitherto **a** great self-mystery, **but now I get it I get it. The** kitchen, food, owning **this** space — **this is the grit of life. And** ^{I realize} **how** ^{"sheltered"} **dumb" this** sounds, like I'm

Opacity inverse to length + size from vowels

like I'm some ding-dong that just **discovered** that water is **delicious** when slaking thirst, but — ye upon your high horses — I have been “cooking” (almost) daily for **decades**. The point is: I had never taken **whatever** that next step was towards full ownership. ^{This} reminds me of **meditation practice** (or any ^{practice, for that} matter) as well. Once a week for **decades** gets you almost nowhere (I know, I've done that); allows at best for you to say “I do **meditation**” and **acquire** ^{the} **requisite** ^{mats and towels, sitting pillows, singing bowls.} Whereas ten hours a day for ten days straight can provide you with a tool for **life.** ^{just} **big-loop repetition,** but ^{tight-loop, highly} **iterative, sustained repetition.** ^{Not}
